Neglect to provide the birds with a bath is a fruitful source of sore feet. During the breeding season the hens are liable to get their feet clogged with the nesting material; the sand and excreta adhere to this, and sore feet are the result. The bird affected should be caught, its feet soaked in warm water, all dirt removed, and the sores anointed with a little vaseline or spermaceti ointment. Swollen Joints. These sometimes occur through the bird getting caught by the feet in the wires of the cage. The parts affected should be well bathed in warm water, and painted with friar s balsam. Tumours. Canaries are not often troubled with tumours, yet occasionally they make their appearance. The part usually affected is the beak and head. Tumours are caused by a stoppage of the natural secretions of...
