Date :2007-01. The book details a number of issues in intelligent computing research and its application in recent years. The basic features of intelligent systems were summarized. reviewed the neural network. fuzzy logic and fuzzy neural network of the latest research and development. the evolution of ideas into the calculation of neural network is proposed evolutionary neural network and other basic point of view. that the evolution of fuzzy neural network is an important feature of intelligent systems. Mainly concerning the fuzzy neural network model of computing. fuzzy neural network operator s ability to function approximation. the mapping mechanism of neural networks. neural network learning algorithm and dynamic nature. rational expressions neural network model. the use of target function gradient or trends of the new genetic algorithm. neural network process models. and intelligent content-based Chinese calculation pages in the automatic classification system application. This book brings together the author s recent research and recent advances in the field. the field of intelligent computing is currently an important research topic. as computers....
