

Studies Reprints Volume 18

Filesize: 8.49 MB

Reviews

The book is great and fantastic. It is written in straightforward words and phrases rather than difficult to understand. You won't really feel monotony at any time of your respective time (that's what catalogues are for regarding should you question me).

(Payton Miller)

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 196 pages. Dimensions: 9.7in. x 7.4in. x 0.4in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1914 edition. Excerpt: . . . visible. This narrowed the choice of the second derivative down to methemoglobin or hematin. Furthermore, Griiter has made excellent spectroscopic observations on blood dropped into pneumococcus cultures. From the appearance of the absorption band in red and from the spectroscopic changes on reduction he reached the conclusion that some substance in a pneumococcus culture converts oxyhemoglobin into methemoglobin. 4 Therefore we were led at first to use the optical constants of methemoglobin together with those of oxyhemoglobin in the formula for the light absorption as a function of the concentration. Accordingly, crystalline oxyhemoglobin and methemoglobin were prepared from ox blood and the light absorption was determined in dialyzed solutions at the wave lengths 577, 579 pp. (double line, mercury lamp), 546 an and 436141. For the present work the constants at 577, 579 pm and 546p-it were used. The values are for oxyhemoglobin $\alpha_{121.00}$ and: 12: 18. 42, for methemoglobin B, 5. 18 and 27. 3l. IGriiter, VV. , Centralbl. f. Baktrial. , lte Al1t. , Orig. , 1900, 1. 241. This method is not entirely free from objection, because the spectrum of the reduction product of hematin, hemochromogen, in relatively small quantities, would be masked by the diffuse absorption of reduced hemoglobin. It would be thus impossible to distinguish hematin from methemoglobin in the presence of oxyhemoglobin except in the case of relatively large amounts of hematin. The first table represents data collected to show the degree of agreement between-the gasometric and photometric...
